## 4 Implementation Transportmanagement System

Since 2016 MANN+HUMMEL implements for all sites which are named under „Consignee“ and for all modes of transportation a Transport Management System (TMS).

This TMS is driven by the external service provider Supply Chain Factory (SCF) situated in Willich, Germany.

This means for you as shipper, that you have to order **all transports** via the service provider SCF (see point 5).

**Only exception: express shipments:** These shipments have to be ordered and agreed by MANN+HUMMEL (see point 6).

## 5 Pick up request via SCF

**Via SCF you have to order all transports (except express shipments via road or air )**
